

Sustainability & Corporate Social Responsibility

04. THE ENVIRONMENT

Reducing our impact on the local and global environment.

06. OUR COLLEAGUES

Safer workings conditions across our supply chain.

08. SUSTAINABILITY

Leaving the world a better place for the next generation.

CONTENTS

12. COTTON SOURCING

Supporting responsible and sustainable farming practices.

16. RECYCLED MATERIALS

Giving plastics a new lease of life.

20. THE COLLECTION

Our styles made from preferred materials.

COMMITTED TO BETTER

We are a leading manufacturer and brand in the apparel industry, so it is very important that we lead by example with our materials choices, manufacturing processes and social practices.

Sustainability and Corporate Social Responsibility are at the forefront of what we do and we look to offer complete transparency in everything we do, so customers can make an informed choice.

We are on a continuous journey and would like to share some of our successes with you.

BETTER FOR THE ENVIRONMENT

We are committed to introducing better materials and processes into our supply chain to minimise the impact on the environment.

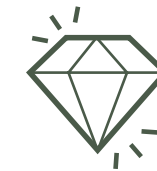

We are forward-thinking and fashion conscious, whilst working to be as environmentally responsible as we can be.

We recognise and embrace the need for change in the industry and are very excited about the developments within our business.

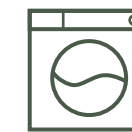

BETTER FABRICS

Our clothing is designed to withstand the rigours of everyday wear and we encourage our customers to treat their clothing with respect and care to help extend their natural life cycle.

Fabrics are tested for:-

DURABILITY

**WASH
PERFORMANCE**

**COLOUR
RETENTION**

BETTER SOURCING

Where we can, we source organic and recycled materials to make our garments and these materials are certified by regulatory bodies.

BETTER PACKAGING

Our aim is to reduce the amount of waste from our packaging throughout our value chain. We have been working to increase the recycled material content within single unit plastic packaging.

BETTER TRANSPORT

We are striving to improve the way we import our goods into Europe and are working with key transportation partners to monitor and reduce the CO2 levels we produce. We will always choose sea freight as our preferred method of transportation.

BETTER FOR OUR COLLEAGUES

We believe that all our employees and those in our supply chain deserve respect and are entitled to ethical working conditions, with fair wages, balanced working hours and no discrimination.

The people who make our garments work in factories that are audited to internationally recognised ethical standards which allows us to have transparency throughout our supply chain and ensure Premier's standards are met and maintained.

We are members of Sedex (SMETA). Being a member of Sedex provides us with an online platform to manage and improve working conditions in our supply chain.

Member of amfori, the leading global business association for open and sustainable trade. We participate in amfori BSCI. For more information visit www.amfori.org

We are members of Amfori BSCI, an association that provides comprehensive commercial, social and environmental services to improve the resilience and sustainability of our sourcing strategy.

Some of our factories are certified to the WRAP (Worldwide Responsible Accredited Production) Standard. WRAP is the world's largest factory-based certification programme for manufacturers of clothing, footwear and other sewn products.

PRODUCT SAFETY

We care about the safety of our products for both our customers and the people who handle our product within our supply chain, which is why our products are certified to **Oeko-Tex Standard 100** where possible.

Having **Oeko-Tex Standard 100** certification ensures when our products are handled, they are safe on the skin, ensuring conformity to the European Directive relating to Azo colourants.

STANDARD
100

Workers at Zhejiang Meixina Garment Co., Ltd in Jinhua, China, March 2024.

SUSTAINABILITY

We are taking every step possible to leave the world a better place for the next generation.

RESPONSIBLE COTTON SOURCING

Where we can, we source cotton that has been grown with more care for the environment, minimising the negative effects of fertilisers and caring for water, soil health and natural habitats.

The conventional method of growing cotton has a considerable impact on the environment and we are trying to do better.

We are proud members of Better Cotton™.

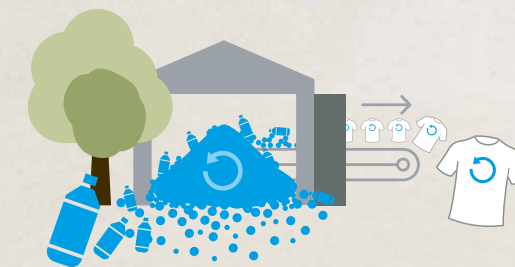

We support Fairtrade producers by purchasing their cotton.

The organic cotton we source is certified to the Organic Content Standard (OCS).

REUSING PLASTICS

We are giving plastic a new lease of life, by reprocessing it into recycled polyester and nylon fibres for our clothing. This means less extraction of raw materials and diverts plastic waste from landfill.

The recycled polyester in our garments comes from pre-and post-consumer materials. We also use post-consumer recycled nylon.

The recycled polyester and nylon we use in our garments is certified to the Global Recycled Standard (GRS) and/or the Recycled Claim Standard (RCS).

SUSTAINABILITY

BETTER PACKAGING

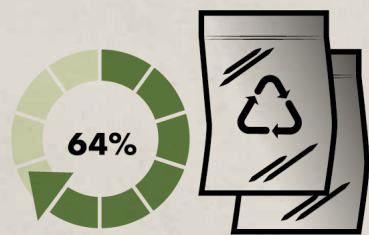

We are reducing the amount of packaging for our products and use recycled solutions where we can.

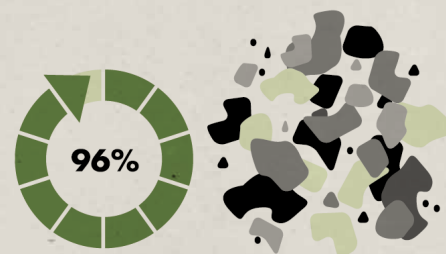

We are excited to see where we can make our reductions and have ambitious targets to:-

- Achieve 100% recycled content within plastic packaging
- Reduce all packaging by 50%
- Report on FSC and recycled paper packaging by 2025
- Report on all our packaging by 2025

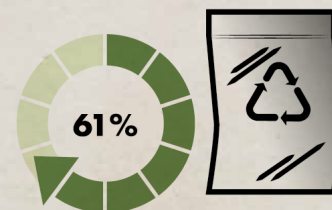

Since 2021 we have been working to increase the recycled material content within single unit plastic packaging and here is our progress to date.*

Polybags containing recycled content has gone up by 64%

Meaning that 96% of polybags now contain recycled content

With 61% of polybags made from 100% recycled content

* March 2024

COMMUNITY ENGAGEMENT

It's important to us to give back, which is why we donate and sponsor charities that benefit the communities where our products are made.

In partnership with the Jaago foundation, we sponsor a class of 40 children at the Jaago School Banani Branch in Bangladesh.

Jaago Foundation is a non-profit organisation that empowers underprivileged individuals and communities through education, youth development, women's rights, climate change, governance and poverty alleviation.

Our sponsorship provides the class with a teacher, uniform, school supplies, medical support, nutritious food and co-circular activities.

We began our sponsorship of this class in 2019; they are currently in the 3rd grade and we will support them until 12th grade so that they can complete their higher secondary certificate.

“Through the Better Cotton training sessions, I have learnt new ways to harvest and store cotton so that the fibre quality is protected”

Farm-worker Djeneba Kone.
Kolondieba, Mali.

Photo Credit: Better Cotton™/
Seun Adatsi

Better Cotton™ is a not-for-profit organisation, committed to improving cotton farming practices globally. Making it better for the environment and better for the people that grow the cotton in securing a future in the supply chain.

We are proud members of Better Cotton™ and committed to sourcing 15% of our cotton as Better Cotton™ by 2026. For every kilogram of Better Cotton™ we purchase, we are allocated a Better Cotton Claim Unit (BCCU).

We have been recording our BCCU's since 2022 and have purchased **180,003 tonnes** of Better Cotton™ to date.*

Better Cotton™ operates on a mass balance basis where Better Cotton™ is mixed with other types of cotton on its journey through the supply chain. Styles may not contain Better Cotton™, but the Better Cotton™ licensed farmers always know their cotton is in demand.

*March 2024

FAIRTRADE COTTON

Fairtrade supports small-scale farmers to secure fairer prices for their cotton. They also work with the farmers to address environmental issues by promoting better agricultural practices that help protect biodiversity through the Fairtrade Standards.

The Fairtrade Cotton Mark displayed on our garments means that the cotton element has been sourced from Fairtrade certified producer organisations.

From **2016-2020**
we sourced

65,110 tonnes
of Fairtrade Cotton.

In **2021** we transferred to
Organic Fairtrade Cotton.

ORGANIC COTTON

Organic cotton crop cultivation is better for the environment because it requires considerably less water than conventional cotton and is grown without the use of toxic pesticides and synthetic fertilizers.

Certified by Control Union
CB-CUC-1119398

Certified by Control Union
CB-CUC-1119398

CERTIFICATION STANDARDS

The organic cotton we use is certified to the Organic Content Standard 100 and/or the Organic Blended Content Standard. These are third-party certifications that verify the percentage of organically grown material and tracks it from source to final product.

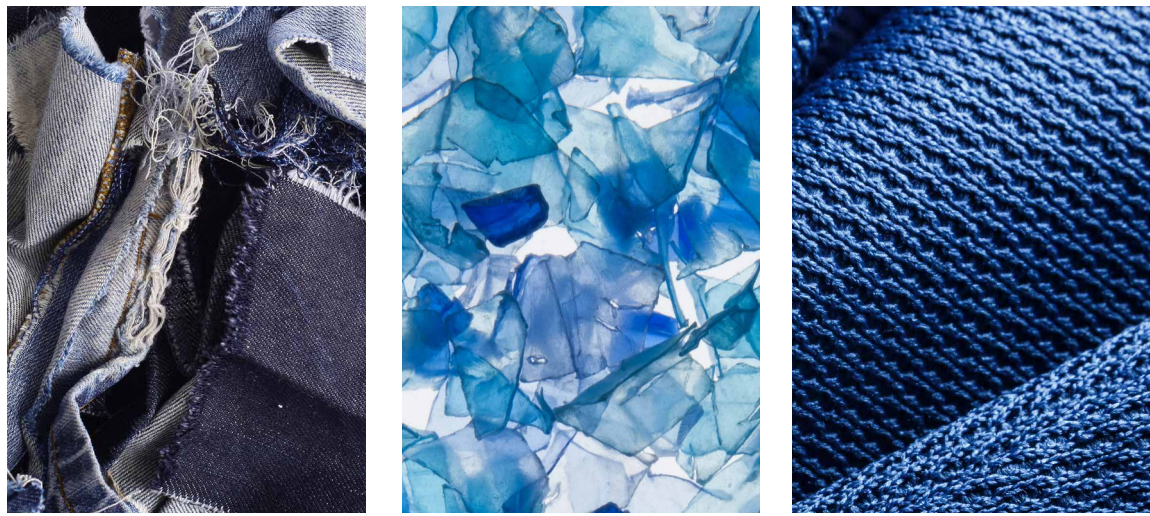

From **2021-2023**
we have sourced

34,859 tonnes
of Organic
Fairtrade Cotton

RECYCLED MATERIALS

When we develop new products, we look to use preferred materials for our fabrics such as recycled polyester, recycled nylon and recycled cotton.

This means less extraction of raw materials and diverts plastic waste from landfill.

The recycled materials in our garments come from pre-and post-consumer materials like PET plastic bottles and fabric scraps.

CERTIFICATION STANDARDS

These materials are certified to the Global Recycled Standard and/or the Recycled Claim Standard. These are third-party certifications that set the criteria for tracking and verifying recycled materials and the chain of custody.

From 2021-2023 we have sourced
172,175 tonnes
of pre-and post-consumer
recycled materials

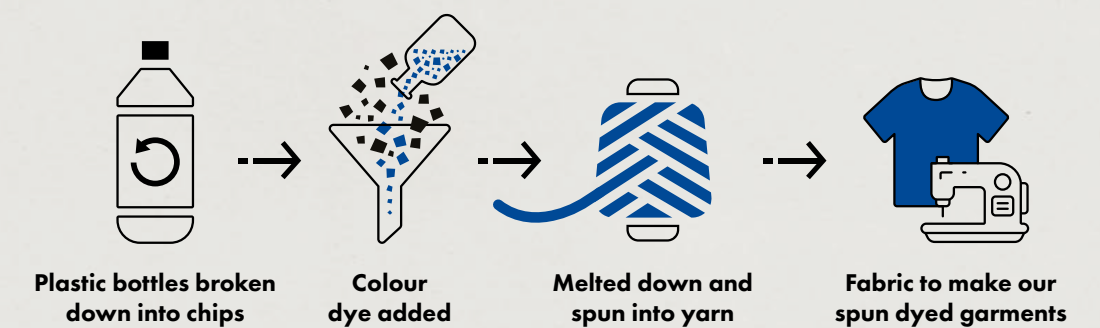

As part of our sustainability efforts,
we are now manufacturing clothing
that has been spun dyed.

SPUN DYEING

In order for the fabric in our clothing to have colour, there is a process of colour dyeing that takes place during production.

Spun dyeing reduces the environmental footprint when compared to traditional piece dyeing methods.

HOW DOES IT WORK?

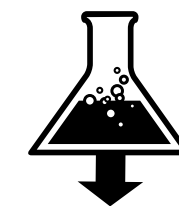

PERFORMANCE BENEFITS

Spun-dyed garments benefit from excellent colour fastness, meaning that the colour won't fade in UV light and they can withstand washing up to 60°C without suffering any long-term colour degradation.

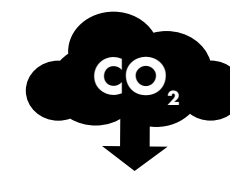

The method of spun dyeing uses:-

66%
LESS WATER

75%
LESS CHEMICALS

60%
LESS CO₂

A COLLECTION WE ARE PROUD OF

Where we can we use preferred materials for our fabrics such as organic cotton, recycled polyester and recycled nylon. When we develop new product, we look to choose these preferred materials to help close the loop on the circular economy. The collection is developing as we move forward with our sustainability goals, and we are proud to offer customers a choice.

APRONS

Organic,
Fairtrade and
recycled choices.

CHEFSWEAR

Chef's shirt and trousers
made with recycled
materials.

POLO SHIRTS

100% spun dyed
recycled polyester
yarns.

 **RECYCLIGHT™**

SAY HELLO

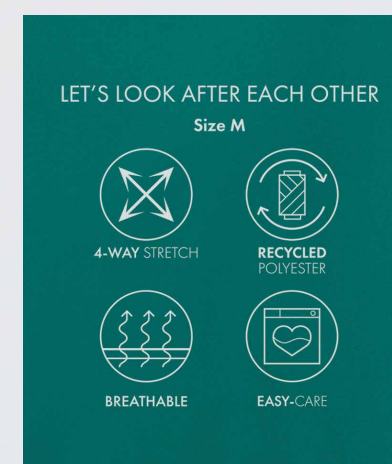

TO A NEW GENERATION OF SCRUBS

Using recycled materials, we have designed an active carewear collection for today's health and beauty professionals.

Tunics & Trousers made from recycled polyester. Underscrub base layers made from recycled nylon.

We encourage customers to look after their uniform using on-garment messaging.

Because there is complete transparency in everything we do, there is a QR code printed on the care label of each Onna garment. This opens to a webpage that shows where the garment is made, the certifications it carries and a video of it being manufactured in the factory.
